

Claim 7, line 24, change "each" to --at least one--.

Claim 13, line 12, after "means" insert --distinct and remotely located from said first operator-actuated control means--.

Claim 14, line 15, after "means" insert --distinct and remotely located from said first operator-actuated control means--.

Claim 16, line 28, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith--; line 29, change "channel select designations" to --channel tuning designations--; line 33, change "channel select designation" to --channel tuning designation which has one of said marker bits associated therewith--; line 34, change "channel select designation to --channel tuning designation--; line 36, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith--.

Claim 17, line 21, change "processor" to --channel tuning control--.

Cancel claim 20.

Claim 25, line 12, after "means" insert --distinct and remotely located from said first operator-actuated control means--.

Claim 26, line 15, after "means" insert "--distinct and remotely located from said first operator-actuated control means--.

Claim 28, line 8, change "marker/order" to --marker--; line 13, change "marker/order" to --marker--; line 20, change "marker/order" to --marker--; line 24, change "marker/order" to --marker--; line 28, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith; line 29, change "channel select designations" to --channel tuning designations--; line 33, change "channel select designation" to --channel tuning designation which has one of said marker bits associated therewith--; line 34, change "channel select designation" to --channel tuning designation--; line 36, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith--.

Cancel claim 29.

Claim 30, line 21 change "processor" to --channel tuning control--; line 24 change "each" to --at least one--.

Claim 32, line 17, change "after" to --upon--.

Claim 33, line 19, change "memory means" to --memory--; line 33, change "memory means" to --memory--.

Claim 35, line 12, after "device" insert --distinct and remotely located from said first operator-actuated control means--.

Claim 37, line 28, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith--; lines 28-29, change "channel select designations" to --channel tuning designations--; line 32, change "channel select designation" to --channel tuning designation which has one of said marker bits associated therewith--; line 33, change "channel select designation to --channel tuning designation--; line 34-35, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith--.

Claim 42, line 29, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith--; lines 30, change "channel select designations" to --channel tuning designations--; line 34, change "channel select designation" to --channel tuning designation which has one of said marker bits associated therewith--; line 35, change "channel select designation to --channel tuning designation--; line 37, change "channel select designations" to --channel tuning designations which have one of said marker bits associated therewith--.
